

INSTRUCTIONS
CHANNEL MENU:

There are many configurations possible when designing your menu. These are just a few examples of the most commonly used layouts. Use the template on the back side of this guide to lay out and plan your menu.

If you use Adobe InDesign, you can download a menu template at wpsignsystems.com/list.php

<i>Sandwiches</i>	
<i>Roast Beef- cheese, horseradish, tomato, lettuce</i>	<i>\$7.95</i>
<i>Pastrami- thin sliced pastrami, cheddar, mustard</i>	<i>\$7.95</i>

] In this example, 2 slots are used for the heading section.

] 1 slot is used for each menu item and its corresponding price.

<i>Sandwiches</i>	
<i>Roast Beef- thin sliced roast beef served with your choice of soup, salad or fries</i>	<i>\$7.95</i>
<i>Pastrami- thin sliced deli pastrami served with your choice of soup, salad or fries</i>	<i>\$7.95</i>

] In this example, 2 slots are used for the heading section.

] 2 slots are used for each menu item and price.

<i>Sandwiches</i>	
<i>Roast Beef</i>	<i>thin sliced roast beef served with soup, salad or french fries</i>
	<i>\$7.95</i>

] In this example, 2 slots are used for the heading section.

] An example of how both large and small text can be used in the same 2 slot area.

<i>Sandwiches</i>	
<i>Roast Beef- thin sliced roast bee</i>	
<i>Pastrami- deli sliced pastrami wit</i>	

] In this example, 1 slot is used for the heading section.

] 1 slot is used for each menu item.

<i>Sandwiches</i>	<i>Drinks - \$2.00</i>
<i>Roast Beef- \$7.95</i>	<i>Lemonade</i>
<i>Pastrami - \$7.95</i>	<i>Iced Tea</i>
<i>Grilled Cheese- \$4.95</i>	<i>Diet Soda</i>

] In this example, the menu board is divided down the middle by simply making two columns. This configuration virtually doubles your available space if you have a large number of items on your menu.

MAKE YOUR MENU!

1. Make photocopies of this worksheet.
 2. Using your menu and this worksheet, you will be able to determine how many menu board sections will be required for your custom menu board. Using a pencil, simply write in your menu items as illustrated in the example configurations on the opposite side. This template represents the total number of rows available for each menu board. You can choose 1 slot, 2 slot or any combination of the two.
 3. Handwriting is an accurate way to estimate how much space you will need for your menu board.
 4. WP will mock up your menu board in your chosen font*!
- *If you have a long menu or a menu with a lot of description, we recommend using the Interstate Condensed font.

This worksheet represents ONE 27" x 24" section.

Name	
Company	
Order # (if applicable)
